

VELUM CLOUD™

Cloud Delivery with Less Friction

Kickstart your Cloud Smart journey with our breakthrough approach to adoption and delivery.

As a leading provider of cloud delivery solutions, Easy Dynamics understands that the friction between organizational needs and regulatory requirements can be a significant barrier to embracing cloud computing services. **Our Velum Cloud™ process was developed specifically to address this pain point, ensuring a smooth, hassle-free cloud adoption journey.**

By combining our cloud technical skills, program management experience, and federal compliance expertise into a single solution, our team delivers a holistic experience that leverages all the benefits of cloud computing: cost efficiency, robust security, and faster delivery of mission-critical services.

Prioritizing Federal Compliance

Our approach to cloud delivery is designed to ensure compliance with both the Federal Information Security Modernization Act (FISMA) and the Federal Risk and Authorization Management Program (FedRAMP). By prioritizing regulatory alignment at every stage and deploying automated solutions, our process neutralizes operational friction and ensures both continuous compliance *and* seamless information sharing from start to finish. Our team also takes a proactive approach to compliance by monitoring Executive Orders and OMB memoranda for the latest guidance on cloud computing and cybersecurity requirements, including ZTA, FICAM, and Cloud Smart.

Optimizing App Migration

Our deep experience with application transformation makes Easy Dynamics a trusted partner for seamless, secure transition to the cloud. Our team has the unique ability to analyze extensive application portfolios and deploy a

targeted, optimized strategy – from complex refactoring to simple like-for-like migration, we have the skills and experience to ensure a complete, successful transition. Our rapid-ATO approach empowers federal clients to quickly harness the full potential of their multi-cloud solutions, maximizing benefits and minimizing time-to-value.

Maximizing Cloud Innovation

Guided by federal Cloud Smart principles, Easy Dynamics maximizes cloud innovation by harnessing the power of AI/ML technologies for automation, streamlining processes, and unlocking new efficiencies. We enhance operational resilience by integrating disaster readiness and risk mitigation strategies, and embrace Agile methodologies to iterate and rapidly deliver continuous improvements. Leveraging cloud innovations allows our team to further accelerate the implementation of a zero trust framework, bolstering security and trust in an increasingly interconnected digital landscape.

Leveraging Our Expertise

By applying our comprehensive range of technical capabilities and subject matter expertise, Easy Dynamics empowers federal agencies to accelerate their Cloud Smart journey. Our knowledge across all major cloud platforms is enhanced by lean Agile delivery methods and expertise in IaC, CaC, and CI/CD pipeline development and integration. We amplify our technical skills with decades of program management, organizational change management, identity management, and continuous compliance experience. This powerful combination delivers radical transparency and reduces friction across the entire cloud adoption experience.
